EurOcean_UV

EUROPEAN UNDERWATER VEHICLES INFOBASE

Vortex Ifremer

EurOcean_UV is a on-line info-base on the Underwater Vehicles used in Europe for Scientific research.

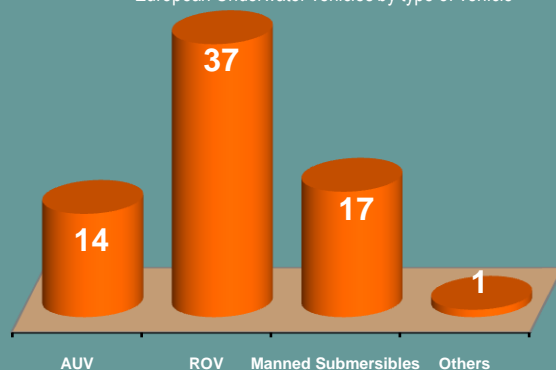

PC-8, IO-BAS

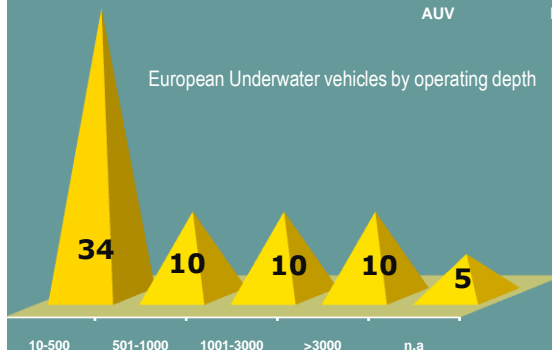

A friendly-user interface allows the end user to select the UVs according to: the name of vehicle, the country, the type of vehicle and the depth range.

European Underwater vehicles by type of vehicle

Three main categories of UVs have been identified : Remotely Operated Vehicles (ROVs); Autonomous Underwater Vehicles (AUVs) and Manned Submersibles.

European Underwater vehicles by operating depth

15 descriptors have been associated to each of the UVs.

Printable PDF files are also available.

Jago, Ifremer

Super Achilles, HCMR
