Taking a significant step towards ensuring impact from research...

the Marine Knowledge Gate helps to

- ... drive innovation from research
- ... reduce the duplication of research effort
- ... connect with research consortia

An innovative online management tool of European funded Marine Science & Technology Projects and their Knowledge Outputs

# Marine Knowledge Gate 1.0

## Marine knowledge management tool

### Direct access to:

- . Research Project Profiles
- . Information on Knowledge Outputs from marine research...  
... in a non-technical language
- . Potential Users & Applications of the Knowledge Outputs

### Easy to search:

- . Variety of search options to narrow the results list
- . Search query for easy navigation / new search choices
- . 2 main interlinked components: Projects & Knowledge Outputs

### Sustainable:

- . Regularly updated and maintained by EurOcean
- . Function for coordinators to add/update projects and their findings

## Marine Knowledge Gate 1.0

### Projects

#### Find out more about a marine project

- . With access to all the project details & knowledge generated
- . Including contacts of project coordinators

#### Need information for statistical reports?

#### Involved in national reports?

- . Obtain listing of marine projects
- by Programme (e.g. FP7)
- by Funding Instrument (e.g. CA)
- by specific Areas (e.g. FP7 ENV.)
- . Classify projects by ranges of allocated funding and duration
- . Identify international collaborations
- . Map country and institutional involvement in European research

### Knowledge Outputs

#### Searching for knowledge in your field of expertise?

- . A wealth of project results, including scientific publications, reports, training modules, workshop proceedings, etc

#### Involved in management or monitoring?

- . Guidelines, standards, RTD protocols, technical manuals, case studies, etc

#### Need to make informed decisions / policies?

- . Available services, books, reviews, etc

#### Looking for commercial opportunities?

- . Details on emerging technologies (prototypes, products) developed through research projects under your sector

... with links  
to further information

EU funded marine research results  
waiting for further exploitation!
